Hands-on Tutorial: Accessing Databases with SQL magic

In this hands-on tutorial, you will create a table, insert some data, and retrieve the results using SQL magic. Click <u>HERE</u> to download the lab notebook (.ipynb)

NOTE: In the previous Lab, you used Jupyter notebooks. In this Lab, you will utilize Jupyter Lab, the next generation UI for Project Jupyter. Additionally, you will utilize SQL magic within Jupyter Lab, to simplify issuing your queries and seeing their results.

This course uses a third-party tool, Hands-on Tutorial: Accessing Databases with SQL magic, to enhance your learning experience. The tool will reference basic information like your name, email, and Coursera ID.
